## PROFESSIONAL SUMMARY

---

Operations and software professional blending hands-on dispatch leadership at FedEx with full-stack development experience from SAS Institute. Skilled in JavaScript, Python, React, Angular, and PostgreSQL, with a strong background in team leadership, efficiency optimization, and customer-facing operations.

## PROFESSIONAL EXPERIENCE

---

### **CXPC Dispatch** — *FedEx, Knightdale, NC* | 2025–Present

- Handle dispatch coverage across four stations, including a legacy Express station.
- Create, modify, and move pickups to the appropriate routes.
- Monitor on-road routes continuously to guarantee pickup reliability.
- Compile end-of-day reports for stations and partner with management on route efficiency.

### **Courier** — *FedEx, Raleigh, NC* | 2022–2025

- Operated company vehicles for courteous, efficient package delivery and pickup.
- Checked shipments for conformance to FedEx features of service.
- Provided route coverage and customer service across the station's service area.

### **Senior Associate Solutions Advisor** — *SAS Institute, Cary, NC* | 2020–2022

- Developed custom controls for SAS Visual Investigator using JavaScript, Angular, and PostgreSQL.
- Collaborated with R&D team members in Scotland; used GitLab, VS Code, and Jira.
- Created and published five Virtual Learning Environment courses on custom-control development (REST APIs, web components, JavaScript).

### **Bar Manager | Beverage Director** — *Midtown Grille, Raleigh, NC* | 2013–2020

- Managed a diverse wine program, purchasing from 12–15 distributors and updating the by-the-glass list.
- Educated staff on wine, presentation, and service; created specialty cocktails.
- Closed nightly, reconciled cash and paperwork, ran monthly alcohol inventory, and consistently met alcohol-cost goals.

## SKILLS

---

**Technical:** JavaScript, Python, React, Angular, CSS, PostgreSQL, Data Analysis

**Operations:** Multi-tasking, Interpersonal Communication, Efficiency Optimization, Time Management, Minimal Supervision

## SOFTWARE DEVELOPMENT PROJECTS

---

- **Hack-or-Snooze** — Hacker News clone
- **Meme Generator** — Giphy-style meme app
- **Flask-Blogly** — Blog app built with Flask
- **This-Is-Jeopardy** — Jeopardy-style game app
- **NC-Beer-Map** — Interactive map of NC breweries and their beers
